

Cycle 2 • Technology Correction & Business Change

Based on the recommendations and options from our Technology Audit, or in anticipation of a change in your business, we'll implement the technology that's right for you. We'll upgrade, update, and prepare your systems to run in the most efficient and secure way possible, ***all for a price you can count on.***

Upgrade Current Technology

If your technology systems break down or are compromised from an outside attack, the business interruption or release of confidential information could cause harm to your customer relationships, your productivity, and your bottom line. The ZenaCareIM Technology Correction & Business Change includes:

- Upgrading Servers & Workstations or Installing New Servers & Workstations
- Data Backup and Recovery Procedures that are Deployed Properly
- Virus Scanning and Spam Filtering that are Deployed Properly
- E-mail that is Efficient, Safe and Secure
- Ensuring All Software is "Legal"
- Firewalls that are Configured Properly
- Internet Connectivity that is Sized Properly and Competitively Priced

Business Change

Your business is growing. You're moving offices. You're adding new locations. You're adding employees. ZenaCareIM Technology Correction & Business Change is a pro-active approach that includes:

- Technology Planning
- Technology Migration
- New Hardware/Software Implementation
- Security and Internet Implementation
- Cabling and Wiring

Technology Replacement Plan

Unfortunately, technology does not last forever. With ZenaCareIM, you know when technology will have to be replaced and can budget accordingly. No more being "blind sided" with the high cost of replacing a critical piece of technology that is needed to run your business.

- Technology Assets Inventoried
- Cost Per Employee Identified
- Quarterly Technology Budget Planning
