

Worry-free networking services. Fixed-fee pricing.

Have you experienced that...

the poorer the job your technology provider does *the more money you pay?* (until you fire them!)

ZenaComp has the solution to this frustrating relationship and it is called ZenaCareIMSM.

- *Worry-Free Technology Systems*
- *A Pro-Active Approach to Minimize Business Interruption*
- *A Method to Alleviate the Pain of "Break-Fix" Networking Services*
- *You Not Having to Pay Your Technology Provider to Fix Their Own Mistakes*
- *No Surprises in Technology Fees*

Cycle 1 • Technology Audit

Our thorough technology audit is the first step in getting control of your infrastructure. We will determine where we're starting from, and then develop a plan to build a solid technology foundation for your organization.

Cycle 2 • Technology Correction & Business Change

Based on the recommendations and options from our technology audit, or in anticipation of a change in your business, we'll implement the technology that's right for you. We'll upgrade, update, and prepare your systems to run in the most efficient and secure way possible.

Cycle 3 • Managed Technology

Once we've achieved a solid technology foundation, we'll pro-actively provide the ongoing monitoring and maintenance to keep you there. Also, you'll be kept informed of the health of your internal systems via detailed reports, and kept abreast of technology trends to position your organization for the future.
